Additional Attempts for Assignments

If the assignment's settings are set for limited attempts, you cannot add additional attempts for a student once the student has met the maximum number of attempts. As a workaround, you can use one of the following options:

- Give all students the same number of attempts. To do this, edit the assignment and enter the number of attempts you want to give all students in the **Number of Attempts** field. Click the **Save** button at the bottom of the screen.

- Make a separate assignment for only one student. To do this, create the assignment following normal procedures. You will need to make the following adjustments for this option to function correctly.

    - When creating the new assignment, scroll down to the *Assign* section and click the **x** on the **Everyone** entry in the **Assign to** field to remove it. Click inside the field and select only the student needing the second attempt.

    - Open the previous assignment (the one for which the student needs another attempt) and click the **Edit** button. Scroll down to the *Assign* section and click the **x** on the **Everyone** entry in the **Assign to** field to remove it. Click inside the field and select each student in the course except the student selected in the previous step. Click the **Save** button at the bottom of the screen.
