

Adding a VoiceThread Assignment

To add a VoiceThread, click the Add Item (+) button in a Canvas course module.

From the add drop-down menu, choose the External Tool option.

Select VoiceThread.

The VoiceThread-Choose Activity type menu will launch within Canvas but can be opened in an external tab.

Choose Assignment Builder, and set up the Participation requirements.

Complete the Assignment Builder fields, and Publish.

The screenshot shows the 'Assignment Builder' interface with the following fields and options:

- Assignment name:** An empty text input field.
- Assignment instructions:** A large empty text area.
- Example URL:** An empty text input field.
- Message shown to student after they submit:** A text area containing the message: "You have successfully submitted the assignment".
- Prerequisite:** A checkbox labeled "Student must complete a prior assignment before starting this one" which is currently unchecked.
- Start date:** A label for a date selection field.
- Navigation:** "Back" and "Publish" buttons at the bottom.

The VoiceThread assignment is added to the Course Module but is unpublished.

For students to access the VoiceThread Assignment, publish the VoiceThread Assignment item.
