## □ Transcript:

Your school may ask you to access MyLab or Mastering from a learning management system or LMS. For example, you might be using an LMS like Blackboard, Canvas, D2L Brightspace, Moodle, Sakai, or Schoology. We'll show you how to access Pearson from your LMS, link a Pearson account with your LMS account, and choose an access option to complete registration. First, let's take a look at how to access your Pearson materials from your LMS.

### Chapter 1: Access Pearson materials

To get started, log into your LMS and enter your LMS course. Next, find a link to access Pearson. The name and location of the link depend on your LMS and course set up. The link is usually named Access Pearson and is located in the left navigation or a content area in your LMS course. But you can also select any Pearson Assignment link or any other Pearson link to access Pearson and continue with registration. You may have the option to add the cost of Pearson course materials to your tuition or fees through a bookstore like Barnes Noble, Follett-Willo, RedShelf, or VitalSource. In that case, look for a bookstore link, sometimes called Course Materials. If you select a bookstore link, you'll be asked to choose your opt method. Opting in adds the cost of Pearson materials to your tuition. Select Launch Courseware, Access courseware, or the option that's right for you, and follow the prompts. If you opt out, you can still buy access through Pearson using a credit card or, if available, PayPal or Apple Pay. Can't find any Pearson links? Check out our help and support link in the description or contact your instructor for help. After selecting a Pearson or bookstore link, choose Open Pearson and agree to any authorization requests or privacy banners.

### Chapter 2: Link accounts

Now, let's link a Pearson account to your LMS account. You'll only need to do this step once. In some cases, we'll create and link a Pearson account for you. Otherwise, you might already have a Pearson account if you've used MyLab, Mastering, or Revel in the past. If so, enter your username and password and then select Link Accounts. If you're not sure, select forgot your username and password. We'll send your account info to the email address you used to create your Pearson account. If you don't have a Pearson account, select create an Account and follow the prompts. Once you've linked an account, select continue to move forward.

## Chapter 3: Access options

Next, we may ask you to choose an access option. If you purchased an access code or got one from the bookstore, select Access Code. Follow the prompts to enter the code. You can also buy access using a credit card or, if available, PayPal or Apple Pay. If it's available and you need more time to choose an access option or if your instructor said you'll later be using a bookstore link to manage your opt status, select Get Temporary Access without payment at the bottom of the page. This gives you full access to your MyLab or Mastering course for a limited time. Next, you'll get a summary of your course registration letting you know you're registered. Select Go to My courses to access your MyLab or Mastering course. To access your course again later, enter your LMS course and select a Pearson or bookstore link again. Choose open Pearson and then select Open MyLab and Mastering to access your course.
